MINI DENTAL IMPLANTS

One of the most rewarding and appreciated procedures offered to patients who wear dentures (especially lower dentures) is the ability to enhance retentiveness and stability. Small-diameter implants (sometimes referred to as 'Mini-Implants') are the ideal answer to this problem. Among their outstanding characteristics are ease of placement, minimum soft or hard-tissue trauma to the patient and the ability to immediately load and provide function. In addition, is the capacity to render this most appreciated service to a wider spectrum of patients due their affordability and the fact that they are well tolerated by otherwise medically compromised patients.

In appreciation of the service this therapy has to offer both the patient and the dental professional and it's current popularity in the dental community, Dr. Davidoff is offering a unique educational opportunity. Direct chairside step-by-step mentoring sessions that allow for a true hands on experience.

He will visit your office for a two day intensive Small Diameter Implant course. The experience will allow you to both place and restore two patients of your selection. You will experience this treatment modality first hand and gain proficiency in your own office, with your own staff and in a familiar environment . After an introductory didactic section and a hands on workshop with surgical models, live surgery and restoration will be your best teacher!

DR. DAVIDOFF

Dr. Davidoff is a graduate of Tufts University School of Dental Medicine. Dr. Davidoff trained with the world renowned expert in Prosthetic and Cosmetic Dentistry, Dr. Jack D. Preston at the Wadsworth Veteran's Administration Hospital in Los Angeles, California. He completed his Prosthodontic Residency in 1979.

Dr. Davidoff is a Board Certified Prosthodontist practicing in Boynton Beach, Florida. Dr. Davidoff perfected his techniques with over 15,000 implants and restorative situations involving hundreds and hundreds of patients. He published many articles in the dental literature and lectured around the Globe. Today, he practices what he learned over all those years with skill and dedication and still welcomes new patients from all over the world.

Dr. Davidoff's full CV can be found on his dental Implant site, www.dental-implants.com along with other information about dental implants and Dr. Davidoff's practice.
